Coarse shape class: blind rating form

35 pairs. Left: ground truth. Right: predicted solid. Both are isometric line drawings with hidden edges in grey; size is not comparable (each drawing is scaled to fit).

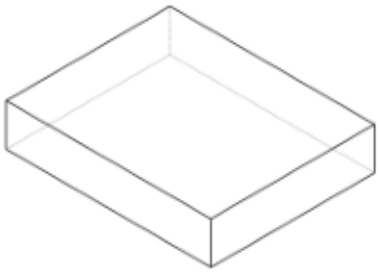

For every pair write in shape_class_form.csv:
  gt_class and pred_class, one of:
    flat plate | prismatic block | solid cylinder | hollow ring or tube | bolt with a disti
  match = yes if the two classes are the same, otherwise no.

Judge the kind of shape only (plate, block, cylinder, ring, bolt), not dimensions, holes or
Do not consult the paper, the sketches or another rater before finishing.
